Nature of job:

1. I am taking theoretical classes and practical classes on **Medicinal Chemistry-II** in **Fourth Year B.Pharm.** from **2001** onwards and also taking theoretical classes on **Special Techniques in Drug Analysis** in **Third Semester M.Pharm.**, theoretical and practical classes on **Organic Chemistry-I** in **First Semester** and **Organic Chemistry-II** and **Pharmaceutical Chemistry-I** and **Pharmaceutical Chemistry-II** in **M.Pharm. Second Semester** from **2007** onwards. Total workload of theory, practical classes & project work of **Medicinal Chemistry-II** in **Fourth Year B.Pharm.**, and **Organic Chemistry-I** in **First Semester M.Pharm.** is **20** hours per week. **Medicinal Chemistry-II** theoretical classes in **Fourth Year & Medicinal Chemistry-I** in **Third Year B.Pharm.** include: Drug metabolism *in-vivo*, concepts on pro-drug, chemistry, biochemistry, structure activity relationship, classification, mode of action, biochemical reaction mechanisms & drug synthesis on various classes. **Medicinal Chemistry-II** practical classes in **Fourth Year** include: Synthetic procedure & reaction mechanism of some organic molecules of medicinal importance & their characteristic studies by determination of elemental microanalysis of CHN%, melting/boiling points, instrumental analysis, pharmacopoeial standards & spectral analysis, biochemical reactions of drug metabolism *in-vitro* through macromolecular biomolecules like microsomal cytochrome oxidase & microsomal cytochrome reductase, microsomal demethylase & microsomal azo/nitro reductase. Synchronization of theoretical part with practical part in **Medicinal Chemistry-II** of **Fourth Year B.Pharm.** is critically done by myself. Biochemical reactions in metabolism of drug molecule *in-vivo* in theoretical classes is justified in practical classes by performing the *in-vitro* reaction by using the specific reagents on the same functional group of the organic molecule to clarify the complicated reaction mechanism of metabolic reactions. I always maintain a perfect compatibility of theoretical classes with practical classes so that it will be easier for the students to understand the drug metabolism. Structural confirmation of the synthesized molecule having medicinal importance is done by the students by interpretation of spectral data & elemental microanalysis to identify the authenticity of structural network. **Pharmacognosy-III (Phytochemistry)** in **Fourth Year B.Pharm.** include structure elucidation and chemistry of alkaloids, terpenes, glycosides and steroids. **Advances in Pharmaceutical Sciences-I & II** include drug latentiation, pharmacokinetic parameters of drug absorption and accelerated stability studies of thermolabile and thermostable drugs, x-ray crystallography and standardization of herbal formulation. Practical in **Organic Chemistry-I** in **First Semester** and **Pharmaceutical Chemistry-I and Organic Chemistry-II** in **Second Semester M.Pharm.** which include synthesis of organic compounds by Condensation Reactions, Nucleophilic Substitution, Beckmann Rearrangement, Pinacol Pinacolone Rearrangement, Sandmeyer Reaction, Diels Alder Reaction, Mannich Reaction, Cannizzaro Reaction, Aldol Condensation, Claisen Condensation, Decarboxylation, Hydrolysis, Keto-Enol Equilibrium and Elimination Reaction. **Organic Chemistry-I, Organic Chemistry-II, Pharmaceutical Chemistry-I and Pharmaceutical Chemistry-II** theory in both M.Pharm. Semester-I and II, which include Chemical Bonding and Hybridization, Reaction Kinetics, Reaction Mechanisms,

Stereochemistry, Photochemistry, Combinatorial Chemistry, Nanochemistry, Microwave Synthesis, Synthon Approach on Drug Synthesis, Name Reactions, Pericyclic Reactions, Chemistry of Vitamins and their Synthesis, Chemistry of Enzymes, Receptor Theory in Drug Action, Molecular Modeling in Drug Design and QSAR and Heterocyclic Chemistry.

2. I decide elective project topics in **Pharmaceutical Chemistry** for the students of **Fourth Year B.Pharm.** according to the recent approaches of pharmaceutical sciences.
